DIAGNOSTIC SCANNER HS-1600

Ultrasound Diagnostic Scanner

Easy to carry light compact body of approximately 3kg,
and reduce user's physical strains during scanning.

- Compact body, easy to carry
- High image quality by H-res technology
- Both battery and AC power usable
- High performance LCD
- Easy key operation
- Variety of measurement functions
- Easy operation of image storage

Excellent ultrasound images

Mobile body with high image quality of
ultrasound diagnostic that representing scanning
region in detail.

Clear + Contrast Harmonic Imaging

Harmonic imaging technology eliminates the side lobe artifact
and brings the clear and identical image of organs with good
contrast.

Our original image enhancement technology H-res (Our Resolution Technology)

Advanced image enhancement technology,
"H-res", brings perfect solution for visibility.
Detail 1 realizes good resolution in deeper
organs. Detail 2 visualizes delicate tissue
structure in shallower region. Detail 3
visualizes bones for observation. Mild reduces
the image enhancement effect. You can also
turn it OFF to have direct ultrasound image.

Mobile body without compromise
Image quality enables proper diagnosis

Mobility & High Quality

Compact body, easy to carry

Easy to carry light compact body of approximately 3kg and reduce user's physical strains during scanning.

Usable in any places

High luminance liquid crystal display with glass bonding treatment enhances visibility, diagnosis images are clearly projected even under the direct sunlight. Liquid crystal display gets no fogged even when temperatures and humidity varies rapidly.

Conventional liquid crystal display

*Sample image of under the direct sunlight

Wide range of 170°viewing angle

Wide viewing angle liquid crystal display has 170°angle in horizontal and vertical. It made free angle diagnosis possible in limited operating environments.

Both battery and AC power usable

Integrated high performance lithium ion battery in the body realizes 3 hours use in the place without power supply. Equipped report function of battery lasting time makes battery sign lights to inform when lasting time becomes short.

Mobility & High Functionality

Doppler functions

Honda Color Flow Mapping (CFM) and Power Doppler (PD) functions do not degrade Black and White image quality when in use.

Measurement functions

Scanning images and measurement result can be stored under the database with easy operation.

Body mark

* Sample pictures

Variety of body marks are prepared to support various diagnostic scenes.

USB

Movie file and still image can be stored to the USB memory and accessed in personal computers. Approx. 100 images are stored in the system memory.

Clear and finest ultrasound image and wide view angle

Introducing glass bonding liquid crystal display. LCD and cover glass are bonded by a special technique and no air layer in between; it leads high visibility and prevents condensation.

Simple operation

Minimum number of operation buttons or keys made interface simpler, and easily operated.

Buttons and keys are placed to be operated by both right and left hands.

Pursuing high performance and user-friendliness
Expanding scanning possibilities by various functions

Variety of setting menu

Variety of measurement functions –distance, area and volume- are employed focusing on obstetrics measurement. It has ultrasound scanning mode, B, B/B, B/M, M, B/Z.

Simple operation of image storage

Diagnostic images are easily stored in system memory and USB memory. Saved images in USB memory are accessible by personal computer. Saved images can be administrated in hospitals as diagnostic record.

Main applications

- OB/GYN diagnosis
- Abdominal diagnosis
- Thyroid, Accessory thyroid, Carotid, and Cervical vein diagnosis
- Musculoskeletal diagnosis
- Diagnosis by house visit
- Brief measurement in the emergency vehicle

Made in Japan

This product is assembled in Japan. We produce even the ultrasound sensor ceramics in its own factory.
